Limited Review Report On The Consolidated Interim Financial Statements

TO: THE BOARD OF DIRECTORS OF SUEZ CANAL FOR TECHNOLOGY SETTling (SAE)

INTRODUCTION

We have performed a limited review on the accompanying Consolidated Interim statement of financial position of **Suez Canal For Technology Settling (SAE)** as of May 31, 2026 and the related Consolidated Interim statements of profit or loss, comprehensive income, changes in equity and cash flows for the nine months then ended, and a summary of significant accounting policies and other explanatory notes. Management is responsible for the preparation and fair presentation of these Consolidated Interim financial statements in accordance with Egyptian Accounting Standards. Our responsibility is to express a conclusion on these Consolidated interim financial statements based on our limited review.

SCOPE OF LIMITED REVIEW

We conducted our limited review in accordance with the Egyptian Standard on Review Engagements (2410), 'Limited Review Consolidated Interim Financial Statements Performed by The Independent Auditor of The Entity'. A limited review of financial statements consists of making inquiries, primarily of persons responsible for Financial and accounting matters in the company and applying analytical and other limited review procedures. A limited review is substantially less in scope than an audit conducted in accordance with the Egyptian Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on the Consolidated Interim Financial Statements.

CONCLUSION

Based on our limited review, nothing has come to our attention that causes us to believe that the accompanying consolidated interim financial statements do not present fairly, in all material respects, the consolidated financial position of the company as of May 31, 2026, and of its consolidated financial performance and its consolidated cash flows for the nine months then ended in accordance with Egyptian Accounting Standards.

Notes To The Consolidated Interim Financial Statements

1. General Information

1-1 Legal Entity

- Suez canal for technology settling S.A.E., established in March 14, 1996 under the name International Hospital for Cancer and Microsurgery under the Law No. 230 for 1989, and replaced by the law No. 8 for 1997 In accordance with Law No. 95 of 1992 and its executive regulations, and pursuant to the decision of the Chairman of the General Authority for Investment and Free Zones No. 3097 of 2000, the company's name was amended to "Suez Canal for Technology Settling," and the change was registered in the Commercial Register on November 26, 2000.
- On May 15, 2004, the Extraordinary General Assembly of Suez Canal for Technology settling (S.A.E) the "Merging Company" and Suez Canal Educational Services Company (S.A.E) the "Merged Company" approved the merger, with February 29, 2004 adopted as the basis for the valuation and the merger..
- On 4 November 2004, the Extraordinary General Assembly of both companies approved the valuation issued by the General Authority for Investment and Free Zones pursuant to the Authority's letter No. 1534 dated October 13, 2004.
- On December 27, 2004, the merger was approved by Prof. Dr. the Chairman of the General Authority for Investment and Free Zones.
- The merger was registered in the company's Commercial Register on March 7, 2005.

1-2 Company's Activities

- Establishing and managing technology zones, science incubators, and training centers for preparing researchers, technology transfer, and providing related services.
- Software design and electronic content production – designing and developing software, operating systems, embedded systems, data entry using electronic means, and creating electronic data and information systems in various forms including audio, video, and data.
- Development of computer programs and systems – designing and producing computer programs and systems of all types, operating them, and providing training thereon.
- Housing – leasing units entirely for residential purposes (non-administrative), provided that the number of units is not less than 50.
- Establishment of integrated hospitals and all associated internal therapeutic or service activities for the purposes of the merging company, provided that 10% of the beds occupied are offered free of charge annually during the tax exemption period.
- Establishment and management of universities, institutes, schools, educational institutions, and higher education institutions.
- Investment property.

1-3 Company Headquarters

9 Abdel Qader Street – Garden City, Unit No. 301, 3rd Floor – Cairo. The company's branch was inaugurated at Plot 1/1, Central Axis – within the campus of 6th of October University, 6th of October City – Giza, and the registration has been recorded in the Commercial Register.

1-4 Commercial Register

Commercial Register No. 653 – Investment – Cairo.

1-5 Financial Year

The company's financial year begins on September 1 and ends on August 31 of each year.

The financial statements were approved for issuance by the Board of Directors in its meeting dated July 09, 2026.

1-6 Listing On The Stock Exchange & Central Depository

The company is listed in the official schedule of the Egyptian Exchange.

The company is registered with the Misr for Central Clearing, Depository, and Registration Company (MCDR).

2. Basis Of Preparation Of The Consolidated Financial Statement

The consolidated financial statements have been prepared according to Egyptian accounting standards as well as in accordance with the applicable Egyptian laws and regulations

2.1 Basis Of Consolidation

- The consolidated financial statements have been prepared by combining the financial statements of the parent company and its subsidiaries by aggregating similar items of assets, liabilities, equity, income, and expenses.
- The carrying amount of the parent company's investment in each subsidiary and the parent company's share of equity in each subsidiary have been eliminated.
- All intercompany balances, transactions, and unrealized profits among group companies have been eliminated.
- Non-controlling interests in the net equity and net profits of subsidiaries controlled by the parent company have been presented within equity in the consolidated financial statements under a consolidated caption "Non-controlling Interests" and have been measured at their proportionate share of the carrying amount of the net assets of the subsidiaries.

The Acquisition Cost Has Been Allocated As Follows:

1. The fair value of the acquired assets and assumed liabilities at the acquisition date, limited to the parent company's ownership interest obtained at that date.
2. Any excess of the acquisition cost over the parent company's share in the share capital of the subsidiaries is recognized as goodwill.

2. Basis Of Preparation Of The Consolidated Financial Statement (Continued)**2.1 Basis Of Consolidation (Continued)****Scope Of The Consolidated Financial Statements**

- The consolidated financial statements include companies in which the Company holds more than 50% of the share capital and exercises control, as well as companies in which the ownership percentage is less than 50% but over which the Company has the ability to control decision-making. The following is a list of the companies included in the consolidated financial statements:

Shareholding %6th Of October University

%99.68

**2.2 Accounting Standards & Legal Principles**

- The accompanying Consolidated financial statements have been prepared in accordance with the Egyptian accounting standards ("EAS")
- Significant Accounting policies applied on the company are disclosed in Note (3).

2.3 Functional Currency & Presentation Currency

The Consolidated financial statements are presented in Egyptian Pound referred to as "Egyptian Pound" or "EGP", which is the Company's functional currency.

2.4 Use Of Estimates & Judgments

- The preparation of The consolidated financial statements in accordance with Egyptian Accounting Standards requires management to make judgments, estimates and assumptions that effect the application of policies and reported amounts of assets and liabilities, income and expenses. These estimates and assumptions are based on past experience and other relevant factors. Actual results may differ from these estimates.
- The estimates and underlying assumptions are reviewed on an ongoing basis.
- Revisions to accounting estimates are recognized in the year in which those estimates were revised if the revision affects only that year or in the year of the revision and future years if the revision affects both current and future years.

The Following Are The Explanatory & Main Items & Notes Used In These Estimates & Personal Judgments:

1. Fixed assets & Intangible Assets useful lives
2. Recognition of deferred tax assets and contingent liabilities.
3. Impairment of trade receivables, other debtors and Due from related parties.
4. Provisions
5. Classification of Lease Contracts
6. Revenue Recognition: Revenue is recognized in accordance with the detailed provisions of the applied accounting policies.

A- Personal Judgment

Information regarding judgments applied in the implementation of accounting policies that have a significant impact on the amounts reported in the financial statements includes the following:

- Revenue Recognition: Revenue is recognized in accordance with the detailed provisions of the applied accounting policies.
- Classification of Lease Contracts.

B- Uncertain Assumptions & Estimates

Information regarding assumptions and uncertain estimates that may result in an effective adjustment to the book value of assets and liabilities in the next financial period is:

- Revenue recognition and estimation of sales returns (if any).
- Recognition and measurement of provisions and liabilities: Key assumptions regarding the likelihood and magnitude of resource outflows.
- Measurement of expected credit losses on financial assets.
- Useful lives of property, plant, and equipment.
- Recognition of deferred tax assets.

C- Impairment Of Non-Financial Assets

On the date of preparing the financial statements, the company evaluates the asset whether there is an indication that the asset has decreased in value. If there is an indication of this, the company evaluates the recoverable amount of the asset. The recoverable amount of the asset is the fair value of the asset less selling costs or its value in use. Whichever is higher, when assessing the value in use, the estimated future cash flows of the asset are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. When determining the fair value less costs to sell, recent market transactions are taken into account.

If the recoverable value of an asset is estimated at less than its book value, the book value of the asset is reduced to its recoverable value, and the impairment loss is recognized directly in the statement of profit or loss.

If the impairment loss subsequently reverses, the carrying amount of the asset is increased to the adjusted recoverable amount, but only to the extent that the carrying amount does not exceed the carrying amount that would have been determined if there had been no impairment loss in the carrying amount of the asset in prior years. The reversal of an impairment loss is recognized directly in the statement of profit or loss.

2. Basis Of Preparation Of The Consolidated Financial Statement (Continued)**2.4 Use Of Estimates & Judgments (Continued)****D- Provisions**

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past event, and it is probable that an outflow of economic benefits will be required to settle this obligation, and the amount of the obligation can be reliably estimated. The amount recognized as a provision represents the best estimate of the consideration required to settle the present obligation at the reporting date, taking into account the risks and uncertainties surrounding the obligation. Where a provision is measured using the estimated cash flows required to settle the present obligation, its carrying amount is the present value of those cash flows.

Where it is expected that some or all of the economic benefits required to settle a provision will be recovered from a third party, the receivable is recognized as an asset when it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

E- Useful Lives Of Property, Plant & Equipment & Intangible Assets.

The company's management determines the estimated useful lives of fixed assets and intangible assets for the purpose of calculating depreciation and amortization. This estimate is made after taking into account the expected use of the asset or actual obsolescence. The management periodically reviews the useful lives on an annual basis at least and the depreciation method to ensure that the method and periods of depreciation are consistent with The expected pattern of economic benefits of assets.

F- Leases – Incremental Borrowing Rate Assessment

The Company is unable to readily determine the interest rate implicit in the lease; therefore, it uses the incremental borrowing rate to measure lease liabilities. The incremental borrowing rate is the rate of interest that the Company would have to pay to borrow the necessary funds over a similar term, with similar security, to obtain an asset of a value similar to the right-of-use asset in a similar economic environment. Accordingly, the incremental borrowing rate reflects what the Company would have to pay, which requires estimation when observable rates are not available or when adjustments are necessary to reflect the terms and conditions of the lease.

2.5 Fair Value Measurement

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal, as the fair value measurement depends on the assumption that the transaction concerning the asset or transferring the liabilities will take place:

In the principal asset's market or liabilities or

In the absence of the principal market, in the most advantageous market for the asset or liability.

The fair value of the assets or liability is measured by using estimates that will be used by market participants when the asset or liability is quoted, assuming that the market participants act on their best interest regarding their economic benefit. The fair value measurement for the non-financial asset takes into consideration the participants' ability in generation of the economic benefits in the market by the optimal usage of the asset or selling it to another participant to use it with the same quality standards.

The company use evaluation techniques that is appropriate to the circumstances and the required information is sufficient for the fair value measurement, by optimizing the related noticed input benefit, limiting the unnoticed inputs. All the classified assets and liabilities are measured or disclosed in the financial statements with fair values which are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included in level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

3. Significant Accounting Policies

The accounting policies set out below have been applied consistently to all years presented in these consolidated financial statements.

3.1 Foreign Currency Transactions

Transactions in foreign currencies are translated at the foreign exchange rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the date of the financial position statement are translated to Egyptian Pound at the foreign exchange rate in effect at that date.

Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using exchange rate at the date of the transaction.

Foreign exchange differences arising on translation are recognized in the statement of profit or loss.

However, foreign currency differences arising from the translation of the following items are recognised in OCI:

- A financial liability designated as a hedge of the net investment in a foreign operation to the extent that the hedge is effective.
- Cash flow hedges to the extent that the hedges are effective.

3. Significant Accounting Policies (Continued)**3.2 Fixed Assets & Depreciation****Recognition & Initial Measurement**

- Fixed Assets are stated at cost less accumulated depreciation and impairment losses.
- Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labor, any other costs directly attributable to bringing the asset to a working condition for its intended use, and the costs of dismantling and removing the items and restoring the site on which they are located.
- Where parts of an item of fixed assets have different useful lives, they are accounted for as items of fixed assets.
- Gains or losses resulting from the disposal of fixed assets are recognized in the income statement.

Subsequent Costs

The cost of replacing a component of an asset is recognized in the carrying amount of the asset when the Company incurs the cost, provided that it is probable that future economic benefits associated with the replacement component will flow to the Company and the cost of the component can be measured reliably. The carrying amount of the replaced component is derecognized.

Major components of certain items of property, plant and equipment may require replacement at regular intervals. Such major components are accounted for as consolidated items of property, plant and equipment, as their estimated useful lives differ from the estimated useful life of the related main asset. All other subsequent expenditure is recognized in the statement of profit or loss as an expense when incurred.

Depreciation

- Depreciation is calculated to write off the cost of items of fixed assets less their estimated residual values at the end of its estimated useful life. The residual value of an asset represents the estimated net amount that the Company would currently obtain from the disposal of the asset, assuming the asset were already of the age and in the condition expected at the end of its estimated useful life.
- using the (straight-line method) over their estimated useful lives for each item, and is generally recognized in profit or loss.
- Land is not depreciated. Estimated depreciation rates for each type of assets for current period are as follow:

<u>Item</u>	<u>Years</u>
Buildings	50
Vehicles	6.67-5
Furniture & Office Equipment	10
Medical Equipments	10
Machines & Equipments	10
Computers	4
Tools	5
Library Books	5
Gardens	10
Museums	10
Time Share	3

Depreciation begins when the asset is available for use. The asset's remaining values, useful lives and methods of depreciation are reviewed at the end of each financial period.

3.3 Intangible Assets

Individually acquired intangible assets are initially recognized at cost. Subsequent to initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses.

Intangible assets with finite useful lives are amortized over the economic life of the asset. An impairment test is performed whenever there is an indication that the asset may be impaired. The amortization period and the amortization method for intangible assets with finite useful lives are reviewed at least at the end of each financial year.

Amortization is calculated using the straight-line method over the estimated useful life of the asset, as follow:

<u>Item</u>	<u>Years</u>
Computers Softwar	4

3. Significant Accounting Policies (Continued)**3.4 Investment Properties**

Investment properties represent properties held to earn rental income, for capital appreciation, or for both purposes, and are not held for sale in the ordinary course of the Company's business. Investment properties are initially recognized using the cost model, at acquisition cost or at the date of exchange, as applicable.

At the end of each financial year, investment properties are assessed for impairment, taking into account the conditions of an active market for such properties. Any decrease in the recoverable amount below the acquisition cost is recognized in the statement of profit or loss. In the event of an increase in the recoverable amount, such increase is recognized in the same line item, but only to the extent of impairment losses previously recognized in profit or loss in prior financial periods. Investment properties do not include properties held solely for subsequent disposal in the near future, or properties acquired for development or resale in the ordinary course of the Company's business.

Investment properties are carried at historical cost less accumulated depreciation and accumulated impairment losses, if any. Depreciation is calculated using the straight-line method over the estimated useful life of each investment property. The estimated useful lives of each category are as follows:

<u>Item</u>	<u>Years</u>
Buildings	50
Furniture, Machines & Equipment	5-10

3.5 Projects Under Construction

Projects under construction are recognized initially at cost less any accumulated impairment in its value. There is no depreciation until the project is completed and transferred to fixed asset.

It includes all direct expenses required to prepare the asset to be in a state of operation and for the purpose for which it was acquired. Projects under construction are transferred to fixed assets when they are completed and are ready for their intended use.

3.6 Inventory

Inventories are valued at the lower of cost or net realizable value.

3.7 Treasury Bills

These investments are initially recognized at acquisition cost. At the end of the financial period, the investments are measured at net realizable (redemption) value by amortizing the difference between the acquisition cost and the redemption value over the period from the acquisition date to the redemption date. The amortized amount is added to the carrying cost, with the corresponding amount recognized in the income statement.

3.8 Cash & Cash Equivalents

Cash and cash equivalents comprise cash balances and call deposits. Bank overdrafts that are repayable on demand and form an integral part of the Company's cash management are included as a component of cash and cash equivalents for the purpose of the statement of cash flows.

3.9 Related Parties

- All transactions with related parties are booked by the company in the same manner as any other normal transaction with other parties.

3.10 Impairments**Non-Derivative Financial Assets****Financial Instruments & Assets Arising From The Contract****The Company Recognizes Loss Provision For Expected Credit Losses For The Following:**

- Financial assets measured at amortized cost;
- Investments in debt instruments that are measured at fair value through other comprehensive income; And
- The assets arising from the contract.

The Company Measures Loss Allowances At An Amount Equal To The Lifetime Ecl, Except For The Following, Which Are Measured At An Amount Equal To The 12-Month Ecl :

- Debt instruments that were identified as having low credit risk at the reporting date; And
- The other debt instruments and bank balances in which the credit risk (i.e., the risk of default over the expected life of the financial instrument) has not increased significantly since the first recognition.
- Provisions for losses of commercial customers and contract assets are always measured at an amount equal to the expected credit losses over their life.
- In determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECL, the Company considers reasonable and supportive information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis based on the Group's historical experience and known credit assessment, including forward-looking information.
- The company assumes that the credit risk of a financial asset has increased significantly if it more than 30 days past due.

3. Significant Accounting Policies (Continued)**3.10 Impairments (Continued)****The Company Considers A Financial Asset To Be In Impaired When:**

- It is unlikely that the borrower will pay its credit obligations to the group in full, without resorting to the company by measures such as liquidating the guarantee (if any); or
- The financial asset is more than 90 days old.
- The company considers debt instruments to have low credit risk when their credit risk rating is equal to the globally understood definition of "investment degree"
- The expected credit losses over the life span of the asset are the expected credit losses resulting from all possible failures over the life expectancy of the financial instruments.
- Expected credit losses over 12 months are Part of expected credit losses resulting from possible failures within 12 months after the date of the report (shorter period if the instrument's life expectancy is less than 12 months) Maximum period taken into account when estimating expected credit losses and maximum contractual period in which the company is exposed to credit risks.

Measuring Expected Credit Losses

- It is a probability-weighted estimate of credit losses. The present value of all cash shortfalls is measured (that is, the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the company expects to receive).
- Expected credit losses are discounted at the financial asset's effective interest rate.

Credit Impaired Financial Assets

At each reporting date, the Company assesses whether financial assets carried at amortized cost and debt instruments measured at FVOCI are credit-impaired. The financial asset is considered "credit impairment," When one or more events that have a detrimental effect on the estimated future cash flows of the financial asset occur.

Evidence That Financial Assets Are Credit Impaired Includes Observable Data.

- Significant financial difficulty for the lender or issuer and
- Violation of the contract such as failure or being overdue for a period of more than 90 days and
- The restructuring of a loan or advance by the company on terms that the company will not take into account in one way or another; And the
- The borrower is likely to enter bankruptcy or other financial reorganization; or
- The disappearance of an active stock market due to financial difficulties.

Disclosure Of The Provision For Expected Credit Losses In The Statement Of Financial Position

- The loss allowance for financial assets measured at amortized cost is deducted from the total carrying amount of the assets.
- For securities in debt securities that are measured at fair value through other comprehensive income, the loss allowance is charged to the profit or loss and is recognized in other comprehensive income.

Write-Off

The gross carrying amount of a financial asset is written off when the Company has no reasonable expectations of recovering a financial asset in its entirety or a portion. For individual customers, the Company has a policy of writing off the gross carrying amount when the financial asset is two years past due based on historical experience of recoveries of similar assets. For corporate customers, the Company individually makes an assessment with respect to the timing and amount of write-off based on whether there is a reasonable expectation of recovery. The Company expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

3.11 Cash Flows Statement

The cash flows statement has been prepared according to the indirect method.

3.12 Capital**Common Shares**

The direct costs related to ordinary shares issuance and shares subscription options are recorded as a decrease to shareholders equity.

Repurchase Of Share Capital (Treasury Shares)

When share capital recognized as equity is repurchased, the amount of consideration paid, including directly attributable costs, is recognized as a change in equity. Repurchased shares are classified as treasury shares and presented as deduction from total equity.

Dividends

Dividends are recognized as a liability in the year in which they are declared and with the decision of the company's general assembly.

3.13 Reserves**Legal Reserve**

In accordance with the requirements of Law No. 159 of 1981, its Executive Regulations, and the Company's Articles of Association, at least 5% of net profit is appropriated to form the statutory reserve. Such appropriation may be discontinued when the statutory reserve reaches 50% of the issued share capital.

3. Significant Accounting Policies (Continued)**3.14 Trade Payable & Other Credit Balances**

Creditors are stated at nominal value, and liabilities (accruals) are recognized for values to be paid in the future for goods and services received.

3.15 Provisions

- A provision is recognized in the balance sheet when the Company has a present legal or constructive obligation as a result of past event, and it is probable that an outflow of economic benefits will be required to settle the obligation. It can be reliably estimated, and the company reviews the provisions at the date of preparing the financial position and adjusts it according to the best estimate.
- Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessment of the time value of money and, where appropriate, the risks specific to the liability. The increase in the book value of the provision resulting from using the discount to find the present value, which reflects the time value of money, is recognized as borrowing cost.

Legal Claims

The recognition of the provision for legal claims when there are legal claims against the Company and after receiving appropriate legal advice.

Other Provisions

Provisions are recognized when there are other expected claims from third parties with respect to the activities of the Company and, according to the latest developments and discussions and agreements with those parties.

3.16 Revenue Recognition

Revenue is recognized when the Company satisfies its performance obligations by transferring the service to the customer, which occurs upon the transfer of control, provided that the associated costs and any related returns can be reliably measured, management has no continuing involvement or effective control over the service, and the amount of revenue can be measured reliably.

Egyptian Accounting Standard No. (48) – Revenue From Contracts With Customers

Egyptian Accounting Standard No. (48) establishes a comprehensive framework for determining the amount and timing of revenue recognition and replaces the following Egyptian Accounting Standards EAS No. (11) "Revenue", EAS No. (8) "Construction Contracts"

- Revenue is recognized when the customer obtains control of the goods or services. Determining whether control is transferred over time or at a point in time requires the use of professional judgment.
- Incremental costs incurred to obtain a contract with a customer are recognized as an asset if the Company expects to recover those costs.

a. Finance Lease Revenue

Finance income is recognized over the term of the lease based on a pattern reflecting a constant periodic rate of return on the lessor's net investment in the finance lease. Finance income is allocated over the lease term on a systematic and rational basis. Lease payments relating to the period are applied against the gross investment in the lease to reduce both the principal amount and the unearned finance income.

b. Operating Lease Revenue

Lease payments from operating lease contracts are recognized by the lessor as income on a straight-line basis or on another systematic basis.

An alternative systematic basis is used if it is more representative of the pattern in which the benefit from the use of the leased asset is diminished.

Interest income is recognized in the statement of profit or loss using the effective interest method. Accordingly, interest income is allocated over the life of the asset using the effective interest rate, which discounts the estimated future cash payments. In determining the effective interest rate, the Company considers all contractual terms.

c. Investment Income

Income from financial investments is recognized to the extent of dividends received from investee companies, provided such dividends relate to profits earned after the date of acquisition. Dividend income is recognized from the date on which the shareholders' general assemblies of the investee companies approve the dividend distributions.

d. Finance Income

Finance income is recognized on a time-apportioned basis using the effective interest method. Where impairment exists in the receivable balance arising from the recognition of interest income, the carrying amount is reduced to the amount expected to be recovered.

3.17 Employees' Share In Profit

The Company pays 10% from cash dividends as employees share in profit and not exceeding total annual salaries for the employees. Employees' share in profit is recognised as dividends within changes in owner's equity statement and as a liability during the financial period whereas the Company's shareholders approved these dividends. No dividends to be recognised to the employees as a share in profits for the undistributed profits.

3. Significant Accounting Policies (Continued)**3.18 Expenses**

All expenses, including administrative and general expenses and selling and marketing expenses, are to be reflected in the income statement for the financial period that such expenses were incurred.

A. Borrowing Cost

Debit Interest and interest related to interest bearing loans and credit facilities are recognized in the income statement using the effective interest rate method (applicable) according to the accrual basis.

The borrowing cost related to the acquisition or construction of fixed assets is capitalized and added to the cost of the assets and depreciated over its useful life, the capitalization starts when expenses have been incurred on the assets and during the period the company incurred Borrowing cost. The capitalization ceases in the period of temporary stopping construction of the assets or when it is ready for use.

B. Employees' Benefits

Benefit plans contribution schemes are recognized as an expense when the related service is provided. Prepaid contributions are recognized as an asset to the extent that the advance payment leads to a reduction in future payments or cashback. The Company participates in the governmental social insurance of the employees' benefits according to social insurance law no.79 for the year 1975. The Company participate according to this law in the system by a fixed percentage of salaries basis. The Company's obligations are limited in its value of participation, the Companies participations are charged in the income statement according to accrual basis.

C. Income Tax

Income tax expense comprises current and deferred tax. It is recognised in profit or loss statement except to the extent that it relates to a business combination, or items recognised – in the same year or a different one - directly in equity or in Other Comprehensive Income "OCI".

1- Current Income Tax

The current income tax is recognized for the current year and prior years, as it is not paid as a liability, if the tax was already paid in the current year and prior years is more than the due value from these years, this increase will be recognized as assets. The value of the liabilities (assets) current tax for the current year and previous years is measured by the expected payment (retrieved from) to tax authority, by applying the applicable tax prices (and tax laws) or in the process to be issued at the end of the financial year. Current tax also includes any tax arising from dividends. Current tax assets and liabilities are offset only if certain criteria are met.

2- Deferred Tax

Deferred tax is recognized for provisional differences between the accounting basis of assets and liabilities and the tax basis of those assets and liabilities. Deferred tax shall be recognized for all temporary discrepancies expected to be taxed except:

- First recognition of fame,
- Or first recognition of the origin or obligation of the process by which:
 - (1) It's not compilation.
 - (2) Does not affect net accounting profit or tax profit (tax loss).

Temporary differences associated with investments in subsidiaries and sister companies and stakes in joint ventures to the extent that the timing of the reversal of such temporary differences can be controlled and such differences are likely not to be reversed in the foreseeable future.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Future taxable profits are determined based on business plans for individual subsidiaries in the Company. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if certain criteria are met.

D. Finance Income & Finance Costs

The Company's finance income and finance costs include the following:

- Finance income
- Finance Cost
- Foreign exchange gains or losses arising from financial assets and financial liabilities

Interest income and interest expense are recognized using the effective interest rate method.

3.19 End Of Service Benefits

In accordance with Board of Directors' Resolution No. (103) dated 14 April 2015, the entitlement to end-of-service benefits is recognized at the rate of half a month's salary for each of the first five years of service and one month's salary for each subsequent year, calculated based on the employee's last total gross salary.

3.20 Dividend Distributions

Dividend distributions are recognized as a liability in the period in which they are declared.

3. Significant Accounting Policies (Continued)**3.21 Earnings Per Share**

The Company presents basic earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares at the date of financial position.

3.22 Financial Instruments**1) Recognition & Initial Measurement**

Other current assets are initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Company becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

2) Classification & Subsequent Measurement**Financial Assets**

On initial recognition, a financial asset is classified as measured at: amortized cost; FVOCI – debt investment; FVOCI – equity investment; or FVTPL (if any).

Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in this case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is to hold assets to collect future cash flows.
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt instrument is measured at FVOCI if it meets both of the following conditions and is not previously designated as at FVTPL:

- It is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets.
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.
- On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in OCI. This election is made on an investment-by-investment basis.
- All financial assets not classified as measured at amortized cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.
- The accounting policies related to the application is similar to the accounting policies applied by the entity except the following accounting policy

Financial Assets- Business Model Assessment

- The Company makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed, and information is provided to management. The information considered includes:
- The stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realizing cash flows through the sale of the assets;
- How the performance of the portfolio is evaluated and reported to the Company's management; and
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed.
- How managers of the business are compensated – e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- The frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets.

Financial assets that are held for trading or are managed (if any) and whose performance is evaluated on a fair value basis are measured at FVTPL.

3. Significant Accounting Policies (Continued)**3.22 Financial Instruments (Continued)****2) Classification & Subsequent Measurement (Continued)****Financial Assets – Assessment Whether Contractual Cash Flows Are Solely Payments Of Principal & Interest**

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- Contingent events that would change the amount or timing of cash flows.
- Terms that may adjust the contractual coupon rate, including variable-rate features.
- Prepayment and extension features; and
- Terms that limit the Company's claim to cash flows from specified assets (e.g., non-recourse features).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual per amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

Financial Assets – Subsequent Measurement, Gains & Losses

Financial assets classified at FVTPL (if any)	Financial assets at FVTPL are measured at fair value. Changes in the fair value, including any interest or dividend income, are recognized in profit or loss.
Financial assets at amortized cost (if any)	These assets are subsequently measured at amortized cost using the effective interest method. The amortized cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognized in profit or loss. Any gain or loss on derecognition is recognized in profit or loss.
Equity investments at FVOCI (if any)	These assets are subsequently measured at fair value. Dividends are recognized as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognized in OCI and are never reclassified to profit or loss.
Debt investments at FVOCI (if any)	These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognized in profit or loss. Other net gains and losses are recognized in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.

3) Disposal**Financial Assets**

The company excludes the financial asset when the period of validity of the contractual right to obtain cash flows from the financial asset ends, or transfers the contractual right to receive cash flows from the financial asset in a transaction in which all risks and benefits of ownership of the financial asset have been materially transferred. Or if the company does not substantially transfer or retain all the risks and benefits of ownership of the financial asset and the company does not retain control.

The Company enters into transactions whereby it transfers the assets recognized in its financial position list, but retains all or all of the risks and benefits of the assets transferred. In these cases, transferred assets are not excluded.

Financial Liabilities

The company excludes the financial obligation when it ends either by disposing of it, cancelling it or expiring its period of contract. The company also excludes the financial obligation when its terms are amended and the cash flows of the adjusted obligations are materially different. In this case, a new financial obligation based on the modified terms is recognized at fair value.

When the financial obligation is excluded, the difference between the book value paid and the payable (including any non-cash assets transferred or obligations incurred) in profits or losses is recognized.

4) Offsetting

Financial assets and financial liabilities are offset, and the net amount presented in the statement of financial position when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

Total	507,665	790	(7,588)	500,867

* The amount of EGP 475 million represents the value of the Settlement and Reconciliation Agreement dated 19 December 2017, in addition to an early settlement cheque amounting to EGP 5 million, concluded between Misr Insurance Company and Mr. Sayed Tounsy Mahmoud, in his personal capacity and in his capacity as Chairman of the Board of Trustees of October 6 University. The balance of accounts receivable from Misr Insurance Company was reduced by EGP 5 million, representing the early settlement payment, pursuant to the Board of Trustees' Resolution No. (23) dated October 25, 2023, whereby the Board approved the adoption of the legal opinion regarding Misr Insurance Company's indebtedness to the University. In accordance with Article (362) of the Egyptian Civil Code, the University is entitled to offset its rights against those of Misr Insurance Company amounting to EGP 5 million, together with interest at a rate of 4% for the period from 30 November 2018 to 30 June 2023 (equivalent to 4.5 years), amounting to EGP 0.9 million. Accordingly, the total amount due to the University from Misr Insurance Company amounted to EGP 5.9 million. As a result, the total balance of accounts receivable from Misr Insurance Company amounted to EGP 470 million.

** The amount of EGP 360 million represents the impairment provision recognized in respect of amounts previously paid to Misr Insurance Company out of the total value of the Settlement and Reconciliation Agreement dated 19 December 2017, pending the resolution of the lawsuit filed by the University against Misr Insurance Company concerning the nullity of the aforementioned agreement. The lawsuit was scheduled for a hearing on 11 November 2019, adjourned to 6 October 2021 for examination, then adjourned to June 6, 2022, and subsequently dismissed subject to the outcome of Case No. 323 of 2017 (High Financial Crimes). An appeal (No. 1376) was filed against the judgment declaring the Settlement and Reconciliation Agreement dated 19 December 2017 null and void. On November 7, 2023, the Court rejected Appeal No. 1376 and upheld the judgment of first instance. A further appeal was filed and registered under No. 35750 of Judicial Year 93, and no hearing date has been scheduled to date. The purpose of the impairment provision previously recognized in the amount of EGP 5 million has ceased to exist. Accordingly, an additional impairment provision of EGP 115 million was recognized, resulting in a total impairment provision amounting to EGP 470 million.

**11. Share Capital**

- The authorized capital of the company was determined to be EGP 4 billion, and the issued and fully paid-up capital amounts to EGP 909 million represented in 90,900,000 shares with nominal Value EGP 10 per share, all of which are cash shares
- The Company's shares are centrally deposited with Misr for Central Clearing, Depository and Registry (MCDR) and are traded on the Egyptian Exchange (EGX).

12. Reserves

	31/05/2026 Thousand EGP	31/08/2025 Thousand EGP
Legal Reserve	454,500	247,319
General Reserve*	197,256	342,768
Total Reserves	651,756	590,087

- Pursuant to the resolution of the Ordinary General Assembly held on November 28, 2018, the formation of an amount of EGP 100 million was approved under the General Reserve to strengthen the Company's financial position.

Furthermore, based on the resolution of the Ordinary General Assembly held on December 9, 2021, an additional general reserve amounting to EGP 242 million was established.

- As approved by the Ordinary General Assembly held on 24 May 2026, the transfer of EGP 145 million from the General Reserve to the Legal Reserve was approved. Consequently, the Legal Reserve has reached 50% of the Company's share capital, in accordance with Article (56) of the Company's Articles of Association.

- Hospital donation for the supply of an electrocautery device for eyelash ablation in entropion cases, valued at EGP 10,000.

23. Objectives & Policies Of Financial Instruments Risk Management**23.1 Financial Risk Management**

The Company has exposure to the following risks from its use of financial instruments:

- Credit risk.
- Liquidity risk.
- Market risk.
- Foreign Currency Exchange Risk
- Interest Rate Risk

This note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk.

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Board has established the Risk Management, which is responsible for developing and monitoring the Company's risk management policies. The committee reports regularly to the Board of Directors on its activities.

The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The company's current financial risk management framework is a combination of formally documented risk management policies in specific areas and undocumented risk management policies used in other areas.

a) Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the Company's receivables from customers and time deposits securities.

Investments

The company limits its exposure to credit risk by conducting detailed investment studies reviewed and approved by the Board of Directors. The company's management does not expect any counterparty to fail in fulfilling its obligations.

Guarantees

The Group's policy is to provide financial guarantees only to its subsidiaries if necessary and only after approval by the Board of Directors and the Extraordinary General Assembly.

b) Liquidity Risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

DISCLAIMER: This English version is a translation of the original Arabic version. In the case of a discrepancy, the Arabic original shall prevail.

23. Objectives & Policies Of Financial Instruments Risk Management (Continued)**23.1 Financial Risk Management (Continued)**

The Company's Management Aims To Minimize The Potential Negative Effects Of These Risks On The Financial Performance Of The Company.

c) Market Risk

Market risk arises from the fluctuation of the fair value of the future cash flows of the financial instrument as a result of changes in market prices, such as foreign exchange rate risk, interest rate risk and equity instruments prices, which are risks that will affect the company's income, and financial instruments that are affected by market risk include interest loans and deposits, and the goal of market risk management is to manage and control risks within acceptable limits and at the same time achieve rewarding returns, and the company does not maintain nor Issuance of derivative financial instruments.

d) Foreign Currency Risk

The company is exposed to foreign currency risk on sales and financial assets denominated mainly in U.S. dollars. For other foreign currency monetary assets and liabilities, the company ensures that its net exposure to currency risk is maintained at an acceptable level by buying or selling foreign currencies at spot rates when necessary to address short-term imbalances.

The company does not hedge investments in its subsidiaries, as the currency positions of these subsidiaries are considered long-term in nature. The company does not enter into foreign currency risk hedging contracts.

e) Interest Rate Risk

The company's policy aims to reduce the risk of interest rate fluctuations. The management studies available financing alternatives and negotiates with banks to obtain the best possible terms and interest rates. Borrowing contracts are submitted to the Board of Directors, and the financing position and its costs are periodically reviewed by senior management. The company does not enter into interest rate risk hedging contracts.

Credit Risk**Credit Risk Exposure**

The carrying amount of financial assets represents the maximum credit risk exposure of the company. The maximum exposure to credit risk as of the reporting date is as follows:

	Note No	31/05/2026 Thousand EGP	31/08/2025 Thousand EGP
Debtors & Other Debit Balances	(9)	69,821	31,565
Cash In Banks & Cheques Under Collection	(10)	4,214,801	2,910,833
		4,284,622	2,942,398

Liquidity Risk

The Following Are The Contractual Terms Of Financial Obligations As Per The Consolidated Financial Statements Date:-

	Note No	Carrying Amount Thousand EGP	12 Month Or Less Thousand EGP
May 31, 2026			
Trade, Contractors & Notes Payables	(15)	16,020	16,020
Creditors & Other Credit Balances	(14)	81,996	81,996
		98,016	98,016
August 31, 2025			
Trade, Contractors & Notes Payables	(15)	131,468	131,468
Creditors & Other Credit Balances	(14)	40,380	40,380
		171,848	171,848

Foreign Currency Exchange Rate Risk

Foreign currency risk arises from fluctuations in foreign exchange rates, which affect payments and receipts in foreign currencies, as well as the valuation of assets and liabilities denominated in foreign currencies. To mitigate this risk, the university maintains an open foreign currency position whenever possible. As a result, this risk is relatively low. Furthermore, balances of assets and liabilities in foreign currencies are measured using the official exchange rate at the reporting date. The primary currencies giving rise to this risk are U.S. dollars and euros.

23. Objectives & Policies Of Financial Instruments Risk Management (Continued)**23.1 Financial Risk Management (Continued)****Foreign Currency Exchange Rate Risk (Continued)**

The following table illustrates the company's exposure to foreign exchange rate fluctuations by major currencies:

<u>Exposure To Currency Risk</u> 31/05/2026	USD	EUR	Total
	Thousand EGP	Thousand EGP	Thousand EGP
Banks Current Accounts & Deposits	2,757	11	144,676
Time Deposit	22,329	--	1,166,020
Total Assets In Currency	25,086	11	1,310,697
Creditors Students Tutorial Fees	--	--	--
Total Liabilities In Currency	--	--	--
Surplus Exposure To Risk	25,086	11	1,310,697
Equivalent In Thousand EGP	1,309,991	669	1,310,697
31/08/2025			
Banks Current Accounts & Deposits	334	11	16,805
Time Deposit	19,006	--	922,171

23.2 Financial Instrument**Exchange Rates For Currencies Against Egyptian Pound: -**

	<u>Closing Exchange Rate</u>		<u>Average Exchange Rate</u>	
	31/05/2026	31/08/2025	31/05/2026	31/08/2025
	EGP	EGP	EGP	EGP
USD	52.22	48.52	52.57	48.57
EUR	60.79	56.69	61.31	57.18

Sensitivity Analysis

The increase/(decrease) of exchange rate with 10% of other currencies against the Egyptian pound in May 31, 2026 would affect the financial instruments in foreign currencies and will affect the owners' equity and profit or loss with the amounts shown below assuming that all the variables especially the interest rates are stable ignoring the impact of the expected sales and purchases.

Profit Or Loss (Thousand) EGP

<u>Decrease</u>	<u>Increase</u>
(131,070)	131,070

The increase/(decrease) of exchange rate with 5% of other currencies against the Egyptian pound in August 31, 2025 would affect the financial instruments in foreign currencies and will affect the owners' equity and profit or loss with the amounts shown below assuming that all the variables especially the interest rates are stable ignoring the impact of the expected sales and purchases.

Profit Or Loss (Thousand) EGP

<u>Decrease</u>	<u>Increase</u>
(46,000)	46,000

23. Objectives & Policies Of Financial Instruments Risk Management (Continued)**23.2 Financial Instrument (Continued)****Interest Rate Risk**

This Risk Is Represented In Interest Risk Related To Financial Instrument At Balance Sheet Date As Follows:

	Carrying Amount	
	31/05/2026	31/08/2025
	Thousand EGP	Thousand EGP
Financial Instruments At A Fixed Interest Rate		
Financial Assets		
Bank Deposits and Current Accounts	4,067,606	2,892,088
	4,067,606	2,892,088
Financial Instruments At A Variable Interest Rate		
Financial Assets		
Current Account At Bank	95,568	17,694
	95,568	17,694

The company does not measure any financial assets or liabilities at fair value through profit or loss using a fixed interest rate. The company also does not designate financial derivatives (such as interest rate swaps) as hedging instruments under the fair value hedge accounting model. Accordingly, changes in interest rates as of the reporting date have no impact on the statement of profit or loss.

23.3 Capital Management

The policy of the company's board is to maintain strong capital to keep the confidence of the shareholders, creditors and market and to keep up with the activity's future development.

The board follows up the rate of the return on capital and monitors the dividends to the shareholders.

The board works on making a balance between the highest interests that may arise by the high level of borrowings and the collateral by maintaining strong capital position.

There are not any change of the company's strategy in the capital management during the year and there are not any commitment to the company's capital.

24. Legal Status**Legal Status (Suez Canal Company)**

According to the legal position prepared by the Company's legal advisors, there are ongoing and reciprocal legal proceedings between the Company and third parties, summarized as follows:

- Case No. 1931 of 2019 – Civil – Giza Primary Court, Circuit (11), filed against Misr Insurance Company and others. The case concerns the annulment of the settlement agreement dated 19/12/2017 between Mr. Sayed Tounsi Mahmoud and Misr Insurance Company. The primary court dismissed the case for lack of standing. The case was appealed under Appeal No. 1376 of Judicial Year 137, Cairo Appeal, and was initially scheduled for 7/5/2020 for review, then postponed to 10/9/2020, 2/11/2020 for documents, 2/2/2021 for review, and 8/4/2021 for documents and memoranda. At the session on 8/4/2021, the appeal was reserved for judgment on 6/7/2021.
- The case was resumed for hearing on 6/10/2021 regarding the complaint submitted to the Public Funds Prosecution in Case No. 323 of 2017, Supreme Public Funds. On the same session, it was postponed to 4/1/2022 to review a certificate from the Public Funds Prosecution, then to 5/4/2022, and 7/6/2022. At the last session, the court suspended the case pending the conclusion of investigations in Case No. 323 of 2017, Supreme Public Funds.
- The suspension was lifted by Misr Insurance Company for the session on 5/8/2023. At this session, the court postponed the case to 1/10/2023 and allowed the Suez Canal Company and the University to obtain a certificate regarding the Public Funds investigations mentioned above. The case was then reserved for judgment on 7/11/2023, when the court rejected the Company's appeal and upheld the lower court's ruling. The Company recorded a cash provision for the judgment under entry No. 35750 of Judicial Year 93, in the urgent proceedings, including scheduling the earliest session for the urgent matter and ordering a stay of execution of the contested judgment pending the outcome of the current appeal.

Subject Matter:

- Primarily: To overturn the challenged judgment and restore the case to the status of suspension pursuant to the judgment issued on 7 June 2022.
- Alternatively (in the event the primary request is not granted): To quash the challenged judgment and remand the case to the Cairo Court of Appeal for reconsideration before a different appellate panel.
- A hearing was to be scheduled to consider the urgent request for a stay of execution.
- A hearing was subsequently scheduled for 13 October 2025 to consider the application for a stay of execution of the challenged judgment. At that hearing, the Court of Cassation accepted the appeal, ordered a stay of execution of the challenged judgment, and scheduled 24 November 2025 for consideration of the merits.

DISCLAIMER: This English version is a translation of the original Arabic version. In the case of a discrepancy, the Arabic original shall prevail.

24. Legal Status (Continued)**Legal Status (Suez Canal Company) (Continued)**

- At the hearing held on 24 November 2025, the Court considered the appeal on the merits and, at the end of the session, ruled to accept the Company's appeal, quash the challenged judgment, and remand the case to the Court of Appeal for reconsideration before a different appellate panel.
- The appeal was then re-listed before a new appellate panel, Panel No. 55, and a hearing was scheduled for 4 April 2026.
- At the hearing of 4 April 2026, as neither the appeal file had been received from the previous panel nor the original notice of appeal had been received from the Bailiffs' Department, the Court adjourned the case to 1 June 2026 in order to obtain the appeal file from the previous panel and to allow the Appellant to submit the original notice of appeal and the supporting documents.
- At the hearing of 1 June 2026, since the appeal file had still not been received from the previous panel, the Court adjourned the case to 6 September 2026 for the purpose of obtaining the appeal file from the previous panel and for the parties to review the file and submit memoranda and supporting documents.

Legal Status (October 6 University)

According to the legal position prepared by the university's legal advisors, there are mutual lawsuits between the university and third parties as follows:

Case No. 1376-7 Appeal, filed by Suez Canal Company for Technology Settling against October 6 University and Misr Insurance Company, to cancel the amount due from the university of EGP 470,000,000 based on the annulment of the settlement agreement dated 19 December 2017 with Misr Insurance Company.

On 7 November 2023, the court rejected the appeal and upheld the first-instance judgment, and the appeal was filed under No. 35750 of 93 Q by Dr. Khaled Hamdi Abdel Rahman.

The stay of execution session is set for 13/10/2025, where the court accepted the appeal and stayed execution, with the main case set for 24/11/2025.

Case Status: On 7/11/2023, the court rejected Appeal 1376 and upheld the first-instance judgment, and the university filed an appeal under No. 35750 of 93 Q.

Case No. 173 Q / 2860, filed by Air Cond Company against October 6 University at Khartoum Court, Circuit 8 Appeal. The case concerns the appeal of rejection of supplementary claims for an amount of EGP 165,810, plus interest and compensation of EGP 50,000.

On 10 July 2023, the court rejected the appeal and upheld the university's right to EGP 28,000, and execution procedures are ongoing.

Case No. 21038/142 – Appeal of Judgment No. 5249 of the year 2025 (Civil), in the amount of 950,323 Egyptian Pounds, filed against the University. The first hearing session is scheduled for 26/02/2026.

25. Tax Status**25.1 First: Suez Canal Company****First: Corporate Income Tax****Year From The Commencement Of Activity Until 31/08/2004:**

An appeal on this form was filed, and an internal committee at the authority reviewed the case, reducing the tax to EGP 5,315,968.20, which was fully paid. The business profits penalty up to 12/2023 was calculated at a total of EGP 2,169,897.8 (1,173,153.8 + 996,744).
- The accounts for the years 2021/2022 were settled, and Form 38 was issued. The tax due was EGP 9,001,214.48 for 2021 and EGP 9,054,331.2 for 2022. An appeal on this form was filed, and an internal committee is currently reviewing.

Third: Value Added Tax (Sales Tax Previously)

- The value-added tax (VAT) was audited up to 2018 and fully paid, and monthly VAT returns are submitted regularly.
- The university was audited for the years 01/08/2018 to 31/08/2021, and the audit results determined the tax due as follows:

2018/2019: EGP 5,795,750.20

2019/2020: EGP 5,931,627

2020/2021: EGP 7,268,425

- A meeting report discussing the audit results was prepared, and the taxes due were reduced as follows:

2018/2019: EGP 4,475,793.2

2019/2020: EGP 5,525,028

2020/2021: EGP 6,885,794

- These amounts were approved, assessed, and fully paid.
- The university paid additional VAT for the years:

2018/2019: EGP 2,752,612.82

2019/2020: EGP 3,149,265.96

2020/2021: EGP 2,892,033.48

25. Tax Status (Continued)**25.2 Second: October 6 University (Continued)****Third: Value Added Tax (Sales Tax Previously) (Continued)**

- Accordingly, no VAT or penalties are due by the university up to 31/08/2021. A settlement is in process to obtain a clearance confirming no amounts are due by the university up to 2021.
- The years from 01/09/2021 to 31/08/2024 were audited in SAP, and the audit differences are as follows:

01/09/2021 – 31/08/2022: EGP 5,266,555.69, fully paid

01/09/2022 – 31/08/2023: EGP 4,370,165.35, fully paid

01/09/2023 – 31/08/2024: EGP 10,535,095.75, fully paid

A settlement with the tax authority is in progress.

Fourth: Stamp Tax

- The file was audited up to 2016, and the tax due was fully paid.
- The audit from 01/09/2016 to 31/08/2020 resulted in a total stamp duty (specific, proportional) and development fees of EGP 99,609.35, which was fully paid. Accordingly, no stamp duties are due up to 31/08/2020, and a settlement with the authority is in progress.

Fifth: Withholding & Payment Under Tax Account

- The file was audited from 2012 to 2016, and all amounts were fully paid, with Form 41 submitted in accordance with statutory deadlines.
- The audit for the years 01/09/2016 to 31/08/2022 resulted in total tax differences of EGP 10,942,832. An appeal was filed on this form, and an internal committee is reviewing. EGP 3,845,769 was approved, and the university is being notified for assessment.

Sixth: Real Estate Tax

- Regarding the real estate tax for the university, the academic building, and the library, all claims were fully paid up to the end of 2021.
- The university paid the first installment of the real estate tax due up to 31/12/2025.

Seventh: Medical Stamp Duty

- The medical stamp duty for 6 October University Hospital has been paid up to 31/12/2024.

Eighth: Requirements Of Article (12) Of The Unified Tax Procedures Law No. 206 Of 2020

- In light of the issued financial statements, there are no transactions with related parties that would require the submission of a local file or a master file

26. Significant Events

- a- The Extraordinary General Assembly held on 10 January 2019 approved the Dispute Settlement Agreement regarding the ownership of 6 October University, signed on 6 December 2018, which included an acknowledgment of the company's ownership of 99.68% of the university's capital.

The assembly reviewed the consolidated financial statements of the university for the years 2015, 2016, 2017, and 2018, as well as the financial position as of 30 December 2018, which had been amended, corrected, and approved by the university's auditors. The assembly confirmed that the amended financial statements reflect that Canal for Technology Settling Company owns 99.68% of 6 October University's capital, according to the statements approved by the University Board of Trustees, the University President, and the Chief Financial Officer, and certified by the university's auditors.

It should be noted that the company and its auditors' review of these statements is limited to the balances between the company and the university and the company's share in the university's capital. The preparation and approval of the consolidated financial statements of the university are the responsibility of the Board of Trustees and the University President in accordance with the law. This approval remains valid after the university delivers the documents to the company and the resignation of the current President and Board of Trustees members.

The assembly also approved releasing Mr. Sayed Tounsi Mahmoud from any obligations and liabilities toward the university and the company, in accordance with the above, while reserving the company's right to take legal action in case of any previously undisclosed violations.

Furthermore, the assembly confirmed that all legal measures will be taken to protect the rights of Canal for Technology Settling Company in the university, and any agreements detrimental to the company or its investments will be subject to legal action.

On 6 December 2022, pursuant to Power of Attorney No. 4665 of 2022, Mr. Sayed Tounsi Mahmoud acknowledged that he does not own any shares in 6 October University's capital. He also acknowledged that he will not dispute Canal for Technology settling Company's ownership of 6 October University, now or in the future, and waived any rulings issued in his favor under a special power of attorney.

- b- The Monetary Policy Committee of the Central Bank of Egypt, at its meeting on Thursday, February 12, 2026, decided to reduce the overnight deposit and lending rates, as well as the Central Bank's main operation rate, by 100 basis points to 19.00%, 20.00%, and 19.50%, respectively. It also decided to reduce the discount rate by 100 basis points to 19.50%.

c- Geopolitical Developments & Their Economic Impacts

As of **February 28, 2026** there has been a significant escalation in geopolitical tensions in the Gulf and Middle East regions. These events have resulted in broad economic repercussions affecting both local and regional business environments. The key impacts include the following:

26. Significant Events (Continued)**c- Geopolitical Developments & Their Economic Impacts (Continued)**

Exchange Rate Volatility: The local currency (Egyptian Pound) has experienced a decline against major foreign currencies, potentially impacting import costs and outstanding foreign currency-denominated liabilities.

Energy & Logistics Costs: These developments led to a surge in both global and local fuel prices, resulting in a direct increase in transportation and shipping costs.

Supply Chain Disruptions: The ongoing tensions have caused global supply chain interruptions and delays in deliveries, which may affect operational and production schedules.

Accounting Impact

These occurrences are classified as "Non-adjusting Events" in accordance with accounting standards, as they originated after the balance sheet date. The Company's management is currently evaluating the quantitative impact of these events on future cash flows and results of operations. At present, management believes that the "Going Concern" assumption remains valid and has not been fundamentally compromised

27. New Standards Or Amendments To The Accounting Standards

On October 23, 2024, the Prime Minister issued Decree amending some provisions of the Egyptian Accounting Standards, and the following is a summary of the most important of those amendments:

New Amended Standards	Summary Of The Most Significant Amendments	Impact On The Financial Statements	Effective Date
Egyptian Accounting Standard No. (51) "Financial Statements in Hyperinflationary Economies"	On October 23, 2024, the Egyptian Cabinet issued a decision to add Egyptian Accounting Standard No. (51) "Financial Statements in Hyperinflationary Economies." The standard shall apply to the separate and consolidated financial statements of any company or group whose recording currency is in a hyperinflationary economy. This standard shall also apply to any group that has a foreign currency (including a branch, subsidiary, sister company, joint venture, etc.) in a hyperinflationary economy. This standard essentially requires adjusting the financial statements prepared in the currency of a hyperinflationary economy.	No decision was issued by the Prime Minister or his authorized representative specifying the beginning and end dates of the financial period or periods during which this standard must be applied.	This decision shall be implemented and activated by a decision from the Prime Minister or his delegate.

Mr. Ashraf Mohamed Ibrahim

General Manager - Financial Affairs

Prof. Dr. Ahmed Zaki Badr

Chief Executive Officer

Mr. Amr Ali El-Garhy

Chairman Of The Board
